**Subject: Accessing CDS from remote devices through Vasco or Gemalto Token**

Dear CDS Element,

This is in continuation to our circular dated March 19, 2020 wherein we had informed all the Elements about the CDC's decision for Invoking Remote Access of CDS Elements including "Work from Home" facility.

In this regard, please ensure that the **designated CDS user(s) must carry the Vasco/Gemalto token(s)** for accessing the CDS from remote devices.

Furthermore, we are pleased to note that a substantial number of Elements have successfully setup their devices to avail this facility. CDS Elements who have still not done so may setup their remote access devices by reviewing the *Guidelines for Invoking Remote Access for 'Work from Home' facility* which are available on CDC's website. Our Customer Support Services team is available to provide assistance in this regard.

Should you have any queries or concerns, please feel free to call our Customer Support Services at 0800-23275 (CDCPL).

Stay Safe at Home,

**Operations and Customer Support Services**
